Mini Quiz 18

Name: _____

Kerberos: _____

Consider the following code:

```
int foo(int a, int b) {
    int w = 1 + 1;
    int x = (a + b) / w;
    int y = (a + b) / w;
    int z = (a + b) / w;

    return x + y;
}
```

Q: What are some ways you can think of to optimize this code?
